

In-country Institutional Arrangements for Climate Finance: initial review of countries' experiences

Tuesday, June 14th, 2011

6:15 – 7:45 pm

UNFCCC side event in Bonn, Room TRAM (MoT)

As the global discussions on a financial architecture for climate change evolves, it is becoming clear that is essential to mirror this process with appropriate in-country institutional arrangements for climate finance. Indeed, identifying the best-suited institutional arrangements and financial mechanisms are on top of developing countries' agenda in order to ensure an efficient and sustainable implementation of the new financial flows to tackle climate change.

During this side event, Parties, multilateral agencies, along with The Nature Conservancy, will look into existing institutional arrangements for delivering climate finance in developing countries and approaches and current efforts being taken to enhance the capacity of Governments to access and deliver resources for climate change action. Main elements of national climate change planning and budgeting process, as well as fiscal policies, will be among the topics discussed.
