UNFCCC Bonn Climate Change Conference, May 2012

PAMAs: poverty-alleviating mitigation actions

	Typology	Poverty alleviation potential	
		High	Low
GHG reduction potential	High	Type 1: Poverty alleviating mitigation action Poverty driven mitigation action?	Type 2: Conventional mitigation action, with no explicit focus on poverty (and possible opportunity cost) Climate driven mitigation action?
	Low	Type 3: Conventional action for poverty alleviation, with no explicit focus on reducing emissions (and possible increase in emissions) Non-climate driven poverty action?	Type 4: Failed/low impact mitigation action, failed poverty action, conventional industrial/economic/environmental policy without explicit focus on mitigation and poverty (this will surely partly depend on the scale and cost of the action in terms of what impact it can achieve?)
