Ouagadougou

Population:

16,97millions (2011)

Population growth rate : 3,1%
per Year

HDI : 0,420

BURKINA FASO

CEAS Burkina

CEAS Burkina: research, training and support structure

Legal status :

Established in Burkina since 1982 as a representation of the CEAS Foundation Switzerland, Became a Burkinabé law structure in September 2009

Mission: Contribute to the sustainable development of Africa in general and Burkina Faso in particular, through:

- research actions - development in appropriate technology and renewable energy, adaptation measures to climate change,
- Improving food and nutrition security;
- The fight against poverty;
- Protection and sustainable management of the environment.

INTRODUCTION

After three years of implementation of the project "Accelerating the implementation of regional policies on clean energy in West Africa", the project's objective is in line with the renewable energy component of the national program economic and social development (PNDES) of the government, which gives a large place to renewable energies. Indeed, the government plans to build solar PV plants for a total capacity of more than 300 MWp by 2020.

INTRODUCTION

Before the ACE WA project, many of these actions were carried out without the participation of civil society and grassroots populations.

The ACE WA project, through the coalition, allowed Burkinabè civil society to be informed and involved in the implementation of government RE programs and projects,

THE DIFFERENT STAGES OF THE IMPLEMENTATION OF THE PROJECT

- The completion of the baseline study on the state of play of RE projects and programs in Burkina Faso
- The establishment of the coalition
- Capacity building of CSOs in the coalition
- Developing an advocacy plan
- Implementation of the activities of the advocacy plan

PHOTO DES OSC MEMBRE DE LA COALITION

COALITION ADVOCACY ACTIVITIES

- Organization of two TV shows on renewable energies
- Writing three position documents
- Organization of a press conference on the operationalization of ANEREE,
- National Dialogue on social impacts of solar power plants injected into the grid
- Organizations of a caravan, exhibition sale, TV show on equipment and quality services on RE

Quartier dans le marché**

STAKEHOLDERS IN SOCIAL DIALOGUE

- Representant from 4 ministry of the government
- Representant from the private sector
- The education sector and research sector
- Civil society actors and the National coalition on RE

THE RECOMMENDATIONS OF THE NATIONAL DIALOGUE ON SOCIAL IMPACT

At the end of the exchanges the problems inherent to the implementation of these projects of power station and proposals of solutions were recenbed and are declined as follows:

- Insufficient Communication and Transparency in the development and implementation of projects
- Insufficient association of populations throughout the process of designing and implementing the solar power plant project
- No association of local development organizations at the level of the impact study and its follow-up

THE RECOMMENDATIONS OF THE NATIONAL DIALOGUE ON SOCIAL IMPACT

- Communication / Transparency Information / awareness throughout the project with the involvement of CSOs;
- Prioritize residents in terms of access to electricity Supply of electricity as much as possible;
- Regulatory framework favorable to the access of the residents;
- Creation of sustainable jobs Ensure that the creation of sustainable jobs in the locality is taken into account

ATELIER D'ÉCHANGE SUR L'IMPACT SOCIAL

CONCLUSION

From the above, we can note that the actions of the ACE-WA project led to: -
Effective implementation of the coalition
CSO involvement in the implementation
of government programs and projects
Capacity building of CSOs involved in the
field of RE The CNPDER BF coalition has
become a body of citizen awakening and
awareness in the field of RE in Burkina
Faso
