- **Benito Müller** | Oxford Climate Policy
- **Laura Würtenberger** | GIZ
- **Farhana Yamin** | Track 0
- **Moderator Vera Scholz** | GIZ

Technical assistance and capacity building can be used to mobilise public and private climate-related investments – which are key for the implementation of the Paris Agreement and NDCs. How can the leverage effect and the transformational impact of capacity development be further increased? To explore this question, a study will be presented and experiences will be shared from country representatives and a development bank perspective – followed by an interactive discussion with the audience on enhancing investments for NDC implementation.
