UNFCCC Side Event

Designing New Market Mechanisms

Friday, 18 May 2012; 18:15-19:45

Venue: Ministry of Transport, Room RAIL

The Durban conference defined a new market mechanism, with the modalities and procedures to be adopted this year. This side event will convene an expert discussion on how the new mechanism should be designed to scale up mitigation actions while safeguarding environmental integrity.

Programme:

What are new market mechanisms? An overview of current proposals and challenges for implementation

Wolfgang Sterk, Wuppertal Institute

Pros and cons of different centralised or decentralised accounting and governance frameworks for NMM

Joelle de Sépibus, World Trade Institute

Promoting sustainable development through new mechanisms

Hanna Wang-Helmreich, Wuppertal Institute

New market mechanism and sustainable development

Harald Winkler, Energy Research Centre, University of Cape Town

Facilitation:

Florian Mersmann, Wuppertal Institute
