

## Agenda Side Event at COP27

### CDM transition in the context of ambition increase through Article 6

#### Speakers:

- Ms. Maia Tskhvaradze, Ministry of Environmental Protection and Agriculture, Georgia
- Ms Raphaela Kotsch, Zurich University of Applied Science, Switzerland
- Mr Sangsun HA, Ecoeye, Korea
- Ms Dang Hong Hanh, VNEEC, Vietnam
- Mr Mischa Classen, KliK Foundation, Switzerland

#### Moderator:

- Ms Ximena Samaniego, Perspectives Climate Research

**Date: Thursday 17<sup>th</sup> of November from 13:15 to 14:45, in Room Tutankhamun**

#### Overview:

Article 6 shall increase overall mitigation ambition. COP26 allowed the transition of CDM projects and credits from post-2012 registered projects which was heavily criticized by NGOs arguing that it would actually be reducing ambition. We want to discuss how CDM transition can increase ambition of host country NDCs, for example, by introducing restrictive criteria for project transition, reducing duration of crediting periods, authorizing only a part of CERs for transition, applying stringent methodologies after transition etc. Some countries have been achieving progress in defining and setting up their national framework for the CDM transition. The event aims to discuss the challenges, and the opportunities to increase ambition through transitioning activities and three different experiences at national level in defining a CDM transition framework.

#### Agenda:

Duration	Topic	Speaker(s)
4 min	Setting the scene: why CDM transition and ambition contributions are linked	Ms Ximena Samaniego
15 min	Georgia's approach to CDM transition	Ms Maia Tskhvaradze
8 min	CDM transition in Korea	Mr Sangsun HA
8 min	CDM transition in Vietnam	Ms Dang Hong Hanh
10 min	How the KliK Foundation can contribute to ambition increase and a smooth CDM transition	Mr. Mischa Classen
15 min	Ambition increase through Article 6: key considerations	Ms Raphaela Kotsch
20 min	Panel discussion on CDM transition	Panel discussion with representatives of Georgia, Korea and Vietnam
10 min	Discussion with the audience	Moderated by Ms Ximena Samaniego, Perspectives Climate Research
