

WFO Resource Mobilization Campaign in support of the FARMERS DRIVEN CLIMATE CHANGE AGENDA

Farmers are called to play a significant role in providing a sustainable future for all of humanity. Therefore, in May 2018, to address these challenges, the General Assembly of the World Farmers' Organisation (WFO), www.wfo-oma.org, adopted a new agenda to enhance the position of the farmers in the global political discussion on climate change.

This initiative was born under the name of Farmers Driven Climate Change Agenda and through it, WFO, with the support of the members of the Climakers Alliance, promotes a completely reversed paradigm, where farmers gain a leading role in the global political processes on climate change and agriculture.

The Climakers are the members of the Farmers Driven Climate Change Alliance: farmers and all the stakeholders in the agricultural sector that are committed to provide solutions to climate change, joining their hands with the WFO who is leading this initiative.

Composed of three pillars: **1) Data Gathering; 2) Advocacy; 3) Communications**, this innovative agenda is based on the promotion of best practices that farmers are already implementing as practical solutions to climate change mitigation and adaptation and is intended to be farmers-driven, science-based and result oriented.

WFO implements this agenda in collaboration with the Climakers Alliance partners. The activities at regional level are implemented in a close cooperation with the regional farmers' organizations, who are leading their own regional debate.

In 1 year (from its launch at COP24 in Katowice to COP25, Madrid), we have:

- ✓ Reached out to **2 million Young Farmers in Europe**;
- ✓ Reached out to **500.000 farmers in The Caribbeans**;
- ✓ Promoted more than **100 sustainable agricultural practices worldwide**;
- ✓ Achieved capacity building on climate policies for more than **1 billion farmers**;
- ✓ Succeeded to include **“The Climakers” initiative** in the UN Department of Economic and Social Affairs (DESA) as an **effective model of multi-stakeholder engagement for the implementation of SDG13**.

In the next two years, until COP27, we expect to achieve the following results:

- Reaching out to 3 billion farmers;
- Building capacity on climate policies for more than 2 billion farmers;
- Supporting at least 50 Governments in the preparation of their NDCs;
- Supporting at least 30 countries on food system transformation efforts;
- Encouraging COP countries to adopt sustainable mitigation and adaptation initiatives;
- Widely contributing to the implementation of SDG13 of the 2030 Agenda for Sustainable Development.

The Farmers Driven Climate Change Agenda is very ambitious and its success depends on the Climakers.

Farmers are ready to make a change and willing to be the change!

Stand on the farmers' side and support the WFO in implementing a Farmers Driven Climate Change Agenda!

Pillar	2020	2021	Total Pillar
Data Gathering	570.000 €	250.000 €	820.000 €
Global Advocacy	315.000 €	315.000 €	630.000 €
Communications	280.000 €	280.000 €	560.000 €
Grand Total			2.010.000 €
