# MALINAU, A CONSERVATION REGENCY

In 2005, the Government of Malinau Regency declared itself as a Conservation Regency

Criteria of Conservation Regency are that the regency:

- has conservation area,
- has areas with high conservation value,
- has constraints on regional development due to topographical and logistical conditions,
- has its development vision based in conservation,

# MALINAU, A CONSERVATION REGENCY

Criteria of Conservation Regency are that the regency:

- has a mission focused on having conservation areas become a regency flagship,
- has political commitment to implement sustainable development,
- has a proper environment management institutional system.

# FOREST ECOSYSTEM SERVICES

Hydrology

Ecotourism

Biodiversity

Carbon

# UTILIZATION OF FOREST ECOSYSTEM SERVICES

Guaranteeing the sustainability of  
rainforest areas

Increase in community welfare and  
development

# MALINAU PARTNERSHIP

Government of Malinau Regency has established a partnership with Global Eco-Rescue (GER) facilitated by Borneo Tropical Rainforest Foundation (BTRF)

To implement a pilot project to reduce carbon emission through the voluntary carbon market

# THE PILOT PROJECT

- Will be implemented on three forest areas
- Total area 325,041 hectares
- This pilot project is an initial step that will provide lessons learnt on the utilization of forest ecosystem services for communities and the government of Malinau Regency

# COMMUNITIES ACTIVE PARTICIPATIONS

- A forest conservation program will not success without active participation from the communities that live within and around the forest area.
- Government of Malinau Regency and GER in partnership with BTRF will implement community development program

**MALINAU REGENCY**

**THINK GLOBALLY  
ACT LOCALLY**

# MALINAU REGENCY

welcome any party that want  
to establish mutual partnerships  
for forest conservation in response to global warming

FOR OUR FUTURE GENERATION

**THANK YOU**
