Preliminary agenda

This event will discuss how to redirect financial flows to achieve a 1.5°C world. It will examine how sovereign guarantees calibrated on a social value of mitigation activities can de-risk low carbon investments and grant access of developing countries to cheap loans, including from bond markets.

Confirmed speakers:

**Nadia Maïzi** (Ecole des Mines de Paris, France)

**Jean-Charles Hourcade** (CIRED-CNRS, LA IPCC SR 1.5°C, France): *Architecture for a Sovereign Guarantee Initiative for Climate Finance*

**Seyni Nafo** (advisor - Prime Minister, Mali): *Sovereign guarantees and the Africa Renewable Energy Initiative (AREI)*

**Samir Amous** (APEX Conseil, Tunisia): *Sovereign CC-Rating App. : An integrated asset classification tool to help derisking climate finance*

**Tony Clamp** (GCF, UK): *scaling-up the low carbon investments, the constraints to be removed*
